State policies that promote health, education, and strong families can help the early development and school readiness of America’s youngest citizens. These state policies are especially important to low-income families whose young children lack access to the kinds of supports and opportunities that their more affluent peers receive. Nationally, 10 million children under the age of 6 live in families earning twice the federal poverty level or less. The National Center for Children in Poverty’s Improving the Odds for Young Children project shines a spotlight on state variation in the policy commitment to low-income young children and families.

This national profile aggregates the policy choices of the 50 states and the District of Columbia alongside other contextual data related to the well-being of young children. The first page presents demographic information on children younger than age 6, and subsequent pages profile the policy context related to their: (1) health and nutrition, (2) early care and education, and (3) parenting and economic supports. State specific profiles are also available.

Complete source citations and endnotes are included with this profile. For easy reference, the year of the data appears in brackets. To show the range of variation among states, some graphs identify the states with the highest and lowest percentages alongside the national average.

In addition to the state and national profiles, the project includes:

- Data tables that allow for comparisons across states on each policy choice
- A national report summarizing the research base for policies that promote early childhood development and key findings from the state profiles.

The Early Childhood Profiles will now include policy benchmarks that reflect key supports for the well-being and healthy development of children through age eight. Benchmarks relevant to this expanded early childhood age band will be added in future updates as new policy data become available.

Updated: May 13, 2015
State Choices to Promote Access

- **46** states set the income eligibility limit for public health insurance (Medicaid/SCHIP) at or above 200 percent of the federal poverty level for children ages birth through 5 [2013]³
- **25** states set the income eligibility limit for public health insurance (Medicaid/SCHIP) at or above 200 percent of the federal poverty level for pregnant women [2013]³
- **12** states set the income eligibility limit for public health insurance (Medicaid/SCHIP) at or above 200 percent of the federal poverty level for immigrant children 0-1yr [2013]³
- **6** states set the income eligibility limit for public health insurance (Medicaid/SCHIP) at or above 200 percent of the federal poverty level for immigrant children 3-5yrs [2013]³
- **18** states set the income eligibility limit for public health insurance (Medicaid/SCHIP) at or above 200 percent of the federal poverty level for immigrant pregnant women [2013]³
- **21** states provide Medicaid and/or CHIP coverage for lawfully residing children [2013]⁴
- **17** states provide Medicaid and/or CHIP coverage for lawfully residing pregnant women [2013]⁴
- **32** states provide temporary coverage to pregnant women under Medicaid until eligibility can be formally determined. [2013]³
- **17** states provide temporary coverage to children under Medicaid or CHIP until eligibility can be formally determined. [2013]³
- **6** states include at-risk children in the definition of eligibility for IDEA Part C. [2012]⁵
- **32** states do not require redetermination of eligibility for Medicaid/CHIP more than once a year [2013]³
