State policies that promote the economic security of our nation’s families can help offset larger economic and social conditions that make it difficult for families to get by and get ahead. This four-part profile provides data on Minnesota’s low-income children and families and highlights state policy choices regarding families’ work attachment and advancement, income adequacy, and asset development.

In Minnesota, there are 664,356 families, with 1,257,227 children. Among these children, 33 percent live in families that are low-income, defined as income below twice the federal poverty level (nationally, 45 percent of children live in low-income families). Young children are particularly likely to live in low-income families.

Low wages and a lack of higher education contribute to families having insufficient incomes. Nationally, 48 percent of low-income children have at least one parent who works full-time, year-round; in Minnesota, the figure is 49 percent.

Parents without a college education often struggle to earn enough to support a family, but only 30 percent of adults in Minnesota have a bachelor’s degree. A substantial portion of children in Minnesota whose parents only have a high school diploma—61 percent—are low income.

Children of foreign-born parents are also more likely to be low income than children of native-born parents.

### Income Adequacy

#### State Choices to Increase and Supplement Wages

##### Minimum Wage Standards

- Indexed to inflation
- Not applicable

##### State Earned Income Tax Credit

- Refundable credit available
- Yes
- Percent of federal EITC
- 22-46%

#### State Choices to Reduce Tax Burdens

##### Income Tax Liability

- Income tax threshold for single-parent family of 3: $31,000/year
- Income tax threshold for two-parent family of 4: $34,500/year
- Income tax burden for single-parent family of 3 at 100% FPL: $-1,179/year
- Income tax burden for two-parent family of 4 at 100% FPL: $-1,651/year
Median annual household income for family of four, 2006:
- U.S.: $70,354
- Minnesota: $81,477

Workers covered by a union, 1987 and 2007:
- 1987:
  - Minnesota: 25%
  - U.S.: 19%
- 2007:
  - Minnesota: 17%
  - U.S.: 13%
State Choices to Promote Access to Paid Leave

Family and Medical Leave

State provisions for paid leave[^31] None[^30]

State Choices to Promote Adequate Benefits for the Under- and Unemployed

Unemployment Insurance

Minimum weekly benefit (no dependents)[^32] $38/week
Additional dependent allowance provided[^32] No
Weekly benefit amount is indexed to average weekly wage[^33] Yes
Potential duration of benefits[^34] 10 - 26 weeks

Food Stamps

Legal immigrants eligible for state-funded benefits when barred from federal[^37] Only if they receive TANF or are at least 50 years old; eligibility may be affected by deeming[^36]

Temporary Assistance for Needy Families (TANF) Cash Assistance

Annual maximum benefit for family of 3[^21] $6,384/year
Treatment of child support income[^38] State passes through all support up to court-ordered amount but does not disregard any for purposes of calculating benefits.

[^31]: State provisions for paid leave
[^30]: None
[^32]: Minimum weekly benefit (no dependents)
[^33]: Weekly benefit amount is indexed to average weekly wage
[^34]: Potential duration of benefits
[^35]: Households facing hardships, 2006
[^36]: Only if they receive TANF or are at least 50 years old; eligibility may be affected by deeming
[^37]: Legal immigrants eligible for state-funded benefits when barred from federal
[^38]: Treatment of child support income

ASSET DEVELOPMENT AND PROTECTION

State Policy Choices to Promote Asset Development

Individual Development Accounts

State-supported IDA program in operation

Yes

State Choices to Promote Asset Protection

Public Health Insurance for Parents

Treatment of vehicles in asset test

Categorical eligibility

Temporary Assistance for Needy Families (TANF) Cash Assistance

Assets disregarded for eligibility determination

No

Treatment of vehicles in asset test

Counts equity value in excess of $7,500

Children who are "asset poor," 2004

- U.S.: 30%
- Minnesota: 17%

Homeownership rate, 2007

- U.S.: 68%
- Minnesota: 74%
DATA NOTES AND SOURCES

Data were compiled from 50-state sources. Some state policy decisions may have changed since these data were collected.

1. National data were calculated from the 2011 American Community Survey, representing information from 2011. State data were calculated from the 2009-2011 American Community Survey, representing information from the years 2009 to 2011.

3. If the state calculates co-payments based on the cost of care, figure reflects the co-payment for a 4-year-old in licensed, nonaccredited center care at the maximum state payment rate.

5. States were asked to report state reimbursement rates and the 75th percentile of market rates for their state’s most populous city, county, or region. Data reflect basic provider payment rates (higher rates may be available for particular types of care). Rates are considered below the 75th percentile if they are based on an out-dated market rate survey (more than 2 years old).

7. Figure reflects limit under Medicaid plan with highest income eligibility limit for parents, taking into account the value of earnings disregards (which may be time-limited in some cases).

8. Value reflects comparison of applicant earnings limit for a single parent with 2 children to the highest Medicaid or SCHIP program eligibility limit for children ages 6-19.

10. States have the option of using federal State Children’s Health Insurance Program (SCHIP) funds to provide prenatal care to women regardless of immigration status. They can also extend prenatal care to immigrant women using state funds.

11. The income limit under "regular" Medicaid in Minnesota is 150 percent of the poverty level for children ages 2 through 19. Children up to age 21 are covered through a Section 1115 waiver program that is subject to cost-sharing and reduced benefits; income limits for this program are between 150 and 275 percent of the federal poverty level.

12. Limit includes SCHIP-funded Medicaid expansions, where applicable.

15. Figures reflect the percent of of children (under age 18) and adults (ages 18-64) who did not have health insurance coverage at any point during the year.

18. Figures reflect the percent of children under age 18 and the percent of adults under 65 who were covered by employer-based health insurance during at least part of the year.

19. Figures reflect the percent of children under age 18 and the percent of adults under 65 who were covered by employer-based health insurance during at least part of the year.

20. Figures reflect the percent of children under age 18 and the percent of adults under 65 who were covered by employer-based health insurance during at least part of the year.

22. In most states, the base period consists of the first 4 of the 5 most recently completed quarters. Some states allow claimants to use an alternative base period that includes more recent earnings.

24. State extends eligibility to persons seeking part-time work only if they have a history of part-time work or meet other limited criteria.

20. A general "good cause" provision extends eligibility to persons who leave their jobs for "personal emergencies" or "compelling circumstances", which should include--among others--child care conflicts, illness, domestic violence, and spousal relocation. Eligibility determinations, however, may vary in practice. States may also specifically recognize certain reasons as "good cause"; for more information see Appendix B in Rebecca Smith, Rick McHugh, Andrew Stettner, and Nancy Segal, Between a Rock and a Hard Place: Confronting the Failure of State Unemployment Insurance Systems to Serve Women and Working Families, National Employment Law Project, 2003. Rebecca Smith, Rick McHugh, Andrew Stettner, and Nancy Segal, Between a Rock and a Hard Place: Confronting the Failure of State Unemployment Insurance Systems to Serve Women and Working Families, National Employment Law Project, July 2003.  

23. Figure reflects the percent of part-time workers who are available to work full-time, but usually work less than 35 hours per week due to slack work or unfavorable business conditions, inability to find full-time work, or seasonal declines in demand. U.S. Department of Labor, Bureau of Labor Statistics, *Geographic Profile of Employment and Unemployment, 2003,* "Estimates for States, Table 16: Employed and Unemployed Persons by Full- and Part-Time Status, Sex, Age, Race, and Hispanic or Latino Ethnicity," [http://www.bls.gov](http://www.bls.gov) (accessed March 14, 2008).  

25. State EITC Online Resource Center, [http://www.stateeitc.com](http://www.stateeitc.com) (accessed June 3, 2009); with additional information from NCCP.  

26. The exact percentage depends on income and number of children.  

30. Parents who meet income requirements may receive some income replacement to care for infants through At-Home Infant Care (AHIC) program.  

34. Potential duration is the maximum number of weeks of benefits that a claimant is eligible for under the regular state program. In most states, it is determined based on the amount and distribution of the recipient's earnings in the base period; eight states have a uniform potential duration for all claimants. U.S. Department of Labor, Office of Workforce Security, *Comparison of State UI Laws, 2006,* [http://www.ows.doleta.gov](http://www.ows.doleta.gov) (accessed July 11, 2007).  

Housing Insecurity: Figure reflects the percent of families living in rental units who pay 30 percent or more of their income on housing. U.S. Census Bureau, "American Community Survey Custom Tables, 2006: Gross Rent as a Percentage of Household Income in the Past 12 Months," [http://factfinder.census.gov](http://factfinder.census.gov) (accessed March 14, 2008).  

36. Deeming refers to adding the income and/or resources of the immigrant's sponsor to that of the immigrant's in determining eligibility.  

38. A child support pass-through is the amount of collected child support that the state gives to families on whose behalf the child support was collected. A child support disregard is the amount of child support that the family can keep without lowering their TANF benefits. Janice R. Tinch, *State Policy Re Pass-Through and Disregard of Current Month's Child Support Collected for Families Receiving TANF-Funded Cash Assistance,* Center for Law and Social Policy, 2007.  

39. Community-based IDA programs are operating in all states but often without state support. Also, in some states without state-supported IDA programs, IDA legislation was passed but never implemented due to lack of state funding, or IDA legislation expired, and no new state support was allocated. Center for Social Development, Washington University, "Summary Tables: IDA Policy in the States, Table 1," October 2006, [http://gwbweb.wustl.edu](http://gwbweb.wustl.edu).  

41. Households in which all members receive TANF cash assistance or SSI benefits do not have to meet gross income or asset eligibility criteria. Most states also waive these criteria for recipients of certain other benefits; some states waive these criteria for nearly all applicants. Center on Budget and Policy Priorities, "States' Vehicle Asset Policies in the Food Stamp Program," November 2006.

42. The equity value in Minnesota equals the loan value of vehicle listed in the current NADA Used Car Guide, Midwest edition minus the amount still owed on the vehicle.

43. Figure reflects the percent of children in households that have insufficient net worth to subsist at the federal poverty level for three months in the absence of income. Corporation for Enterprise Development, Assets and Opportunity Scorecard, http://www.cfed.org (accessed February 25, 2008).

44. Figure reflects the percent of households who are homeowners. U.S. Census Bureau, "Housing Vacancies and Homeownership, Annual Statistics 2007, Table 13," http://www.census.gov (March 14, 2008).
